

Sunday.

Dear Mother -

at last the weather has broken and we are now enjoying real summer & Texas sunshine. We have every afternoon free. Just across the road from our camp there is a real nice swimming pool. Usually I go out, not so much ~~to~~ to swim as to bask in the sun. At night about seven we go about eight miles out of town and set up our lights and equipment. Each light section has a particular spot, so arranged that all the sections form a circle around the town. We then wait for the planes to come in. When they fly over our sector we go into action and illuminate the plane ~~for~~ that the guns can fire. There are of course no guns here, just three batteries of searchlights.

It is rather nice out at night. We are always way off in the fields

some water and it is quite and
cool. We arrived back at camp about
twelve o'clock. In the mornings after we
go out (which was everyday this week)
we get up at 8 o'clock.

The other day the General visited
camp. He was so pleased we are now
going to stay here longer. How much
we don't know. We scheduled to
leave next Friday, but now we will
stay at least a week longer. Other
batteries are coming up and we are
supposed to show them how it is
done.

In a way I will be glad to leave here
and get back to Hulen. I am getting a
bit restless and at Hulen the living
conditions are better. We haven't heard
as yet anything about leaving for
New England - but we all hope.

Bob Mac Lane seems to think he will
be called about July. I'll stop now as I must
write a lot of letters. Hope you like the picture.
Love
Jed.

AFTER FIVE DAYS RETURN TO

Prof. W. F. Baskelder

J. L. CA(AA) -

MIDLAND, TEXAS

*Mrs. W. F. Baskelder
2 Harvard St.
Holyoke,
Massachusetts.*
